

As I promised, here is how to get Easy Eggs at NobleGarden Guide!

Keep in mind; I have over 200 pages of gold tips in my book ["Gold Secrets Guide"](#).

Easy Eggs At NobleGarden Event Guide

So Noblegarden week has started and everyone is out hunting for their Easter eggs to complete the "Noble Gardener" achievement and attain the much sought after "the Noble" title. I have found the perfect spot in which you can stand in range of (6) SIX spawn points of Bright Colored Eggs (the ones you need to find in order to loot achievement items and also purchase event items). This is probably only for Horde cause you will definitely get ganked trying this as Alliance.

First of all you need to go to Falconwing Square in the Ruins of Silvermoon. At the north eastern side of the square there is a cart (35.5, 74.0). Position yourself as shown in the [screenshot below](#) so that you are standing on top of the middle fence post.

Refer to the screenshot below and the 'red circles' for the exact spot where the Bright Colored Eggs spawn. You can stand in this spot and never have to move at all and yet you are able to click (and pick up) all 6 egg spawns. It is much quicker to camp here than run around as the spawn rate is quite high.

Secrets...
CLICK HERE!

There is a trick that you can also do while waiting for spawns. Mouseover the **spawn points** (as denoted by red circles in the screenshot) and often you can see the mouse icon change to the loot icon a second before you actually see an egg spawn. If it changes to this icon, click it immediately. This can be extremely helpful if there happen to be others camping/farming the same spot as you will be looting the eggs as they only just see them.

TIP: Also running around the yard in falconwing square just inside the fences with the cameraview from the top you will get alot of eggs.

Also adding a macro with:
/use Bright Colored Egg

To open them and then also make a keymapping to the aggbasket for the runspeedboost will make it easier.

There is a full color map of all the mining points and the exact route you need [-HERE--](#)

Remember, you can get over 100 pages of gold tips including tips for the Burning Crusade [-HERE--](#)
